

Extension: Webgate Form Manager

By Webgate www.webgate.ee

About

This is read me file of "Webgate Form Manager" extension. Extension contains:

- Administrative tools for feedback form management and configuration
- Content templates needed to use forms in your website

Installation

1. Copy the folder "webgate_form_manager" to extensions/ directory in your site root.
2. Go to your site: Admin > Extensions > Extensions and click Refresh to synchronise.
3. Go to Admin > Extensions > Webgate Form Manager and click "Configure" button on toolbar. Update default configuration values if necessary.
4. Default content template for feedback forms will be visible in section editor. If you want to use modified template, do not change template file inside /extentions/webgate_form_manager/templates (your changes will be overwritten with extension update) - create your own custom template instead
5. Default CSS file is included by default content template. If you want to modify your form styles, create custom CSS file. Changes made inside "/extentions/webgate_form_manager/css/" directory will be overwritten by extension update
6. Install Saurus CMS extension "CAPTCHA" if you want to verify form poster's human origin and avoid spam-bots. You can download this extension for free from [Saurus CMS homepage](#)

Version history

Version 1.0 / 01.08.08

Initial release

Version 1.1 / 17.11.08

You can now set form submission limit and use auto-reply function to notify your users to successful form submission.

Version 1.2 / 20.01.09

Improved goal conversion handling - you can now set custom goal uri to override usual goal handling.

Minor bug-fixes.

Version 1.3 / 15.02.09

You can now insert form fields visible for administrator only. Posted form data can be sorted.

Version 1.4 / 25.05.09

New features managing posted data - CSV export and pagination.
Couple of bug-fixes.
