

# Extension: Webgate SEO Tools

By Webgate [www.webgate.ee](http://www.webgate.ee)

## About

This is read me file of "Webgate SEO Tools" extension. This extension contains various modules needed for effective SEO (*Search Engine Optimization*)

## Requirements

Saurus CMS full version or Saurus CMS SE (starting from version 4.4.0) with "Friendly URL's" module is required to use all features of this extension. If you use Saurus CMS Free or Saurus CMS SE without alias support, you cannot use Alias Generator and alias-related options in Meta Manager / Redirects

## Installation

1. Copy the folder "webgate\_seo\_tools" to extensions/ directory in your site root.
2. Go to your site: Admin > Extensions > Extensions and click Refresh to synchronise. Link "Webgate SEO Tools" will appear under "Extensions" menu.

## Version history

### Version 1.0 / 19.05.2008

Initial release.

### Version 1.1 / 19.06.2008

New option to define SEO-friendly redirects (301 Moved Permanently).

### Version 1.2 / 12.07.2008

Some IE-compatibility issues solved.  
New option "Spider Log" to log search engine crawler activities.

### Version 1.3 / 01.08.2008

Minor bug-fixes.  
New configuration fields to define prefix and suffix for website title.

### Version 1.4 / 15.08.2008

Output filter for Meta Manager allows you to display only desired part of site's tree.

### Version 1.5 / 23.08.2008

New option to redirect (*HTTP 301 move*) users from object's detail view to parent object. This option

can be activated in meta manager with purpose to avoid duplicate content issues that often arise with article's detail view.

### **Version 1.6 / 10.05.2009**

You can now change object headline in Meta Manager. Alias generator can now translate cyrillic into latin.
